**Inspector:** Team 1 (Juniors Programmers)

**Inspector leader:** Camila Bohorquez

### **Evidence**

- **Presentation Letter:**

- Only photographs were taken, accompanied by descriptions. There was no signed letter from the customer.
- No audio or video evidence.

- **Requirements:**

- Complete requirements (10 requirements)

- **Class Diagram:**

- Not found controller folder.
- In folder model I the class administrator exist a method name "Administrator".
- It doesn't have a verb.
- Large class file manager in folder utils.

- **Code consistency/ Code execution:**

- In class Utility Bill, have different declaration between the class diagram and the code.
- Unnecessary methods great access, log access, revoke access.
- The Json methods is repetitive in all code.
- You can create another class to save the data in the Json file.
- You have so many small methods that are unnecessary last great access, log cesarevich access.
- Is necessary is only one library to Gon folder, the other versions are unnecessary.
- Class menu is in a different folder between the class diagram and the code.
- **Clean Code:**
  - Unnecessaries commentaries.
  - Commentaries in Spanish.
  - Repetitive methods in all class.
  - Methods inconsistency.
